

BSolutions

A proficient company for every building projects

Our mission

BSolutions offers skills in 6 specific and complementary departments:

1. Stability
2. Sustainable development
3. Project management
4. Safety & health
5. Special techniques
6. Roads, landscape infrastructure and Telecommunication

Our values

We always keep in mind "Small and medium-sized companies". We can summarize our values in these words: listening, studying and advising each client and each project. Thereby we provide proximity, flexibility and efficiency to our client.

Our team

Our team is qualified and always willing to bring solutions to building projects.

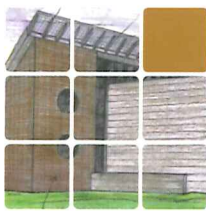

Multiple disciplines within our team are a great strength. Our team is made up of civil, industrial, architect and construction engineers, draftsmen/project designers, safety officers. A qualified, experienced and comprehensive team who manage our building projects from the draft until the end of the achievement.

Our advantages

One company for all construction skills

A dedicated project manager leading your project from A to Z with a high flexibility related to our profile of « Small and medium-sized companies » Multiplicity and complementary of our abilities for the totality or partial management of projects.

ARCHITECTURE

Beside BSolutions, BSolutions Architecture is a young company which started to work with private clients but after several years it has become more professional, commercial and public.

SAFETY & HEALTH

At BSolutions, there are safety officers of grade A and B for all kind of works. Safety during building construction has become essential. Safety is our main concern and is developed from the beginning to the end of the project and also during the building maintenance work.

STABILITY

Stability is the priority at BSolutions. With our projects such as structure studies, advice for the concept, optimization, check of the execution of works, analyse of the ground, our company is now more efficient in stability and engineering issues.

SPECIAL TECHNIQUES

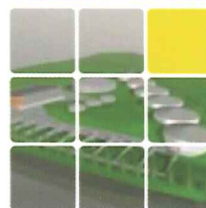

To be more competitive and to offer a high-level of performance, BSolutions has developed a range of special techniques to provide a complete set of studies in heating, air-conditioning, ventilation, electricity, sanitary, access control, prevention, anti-intrusion and piping.

SUSTAINABLE DEVELOPMENT

We check the environment and energy impacts of the building. We are advanced in renewable energy and we make environment surveys in relation with the Kyoto Treaty.

ROADS, LANDSCAPE INFRASTRUCTURE AND TELECOMMUNICATION

BSolutions is also qualified for projects such as roads, draining, networks studies, cleanup studies and compliance certificates for petrol stations. BSolutions has worked on various missions in the telecommunication's field like the development of mobile phones networks.

PROJECT MANAGEMENT

Time is an undeniable fact in any construction projects. We bring effective support to our clients. In this department, BSolutions is also in charge of operational planning, detecting critical schedules, building follow-up on site and cost control.
